

If you wish to make templates for the units make 7 copies of this page **at 100% scale**. This is especially nice printed out on vellum so you can clearly see the overlap. Carefully cut out the triangle templates. Use a single template for the triangle units. Tape the remaining triangle templates into rows as shown above. **Be sure to overlap the edges that touch so the seam allowances are not included inside the shape.** Trim the excess corners that do not apply to the shape.
