

Making the Templates

Place semi-transparent template plastic over the pattern and, using a permanent marker, trace the pattern piece onto the plastic. Add the template letter and the arrow indicating the grain line.

Cutting the Borders

When cutting strips from the border print, take care to leave exactly $\frac{1}{4}$ " seam allowance beyond the outside edge of each stripe. From the **wide stripe** of the **border print** fabric, cut two strips $5\frac{1}{4}$ " x 74" (reserve for outer border top and bottom), and four strips $5\frac{1}{4}$ " x 50" (reserve for outer border sides). From the **narrow stripe**, cut two strips $1\frac{3}{4}$ " x 48" (inner border top and bottom) and four strips $1\frac{3}{4}$ " x 32" (inner border sides). **Note:** The border print strip lengths include allowance for centering motifs as in the featured design. From **Fabric 5**, cut lengthwise strips as follows. Cut

two strips $2\frac{3}{4}$ " x 62" (middle border sides) and two strips $2\frac{3}{4}$ " x 52" (middle border top and bottom).

Cutting H from Border Print Fabrics

After cutting the border strips, use the remainder of the border print yardage to cut 80 H as described and illustrated. Using a right angle triangle, draw a line down through the middle of plastic Template H. Place plastic H on selected mirror-imaged motif in the narrow stripe of the border print fabric, making sure that a stripe from the fabric falls just inside the sewing line on the long side of the template. With the template in place on the fabric, trace a portion of the design directly onto the template. As you move the template to cut the remaining pieces, use this mark as a guide for lining up the template. Carefully draw around the template and cut out the piece. Cut 80 identical H triangles; reserve for the block corners.

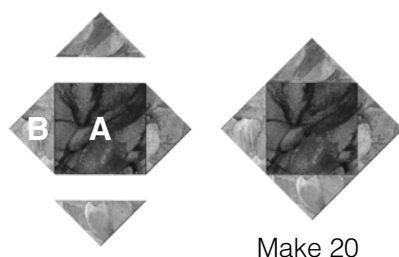

Cutting the Block Fabrics

Cut the block fabrics according to the quantities indicated on the templates.

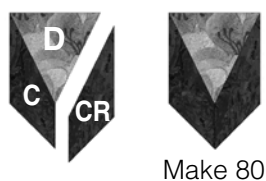

Piecing the Blocks

Step-by-step piecing diagrams are shown below. Following are specific diagrams for each colorway.

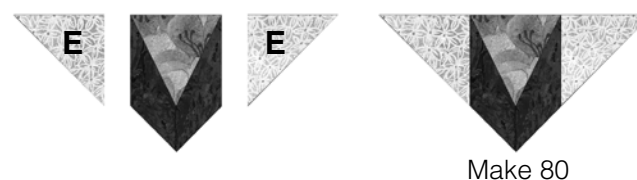

1. Sew four Template B triangles (Fabric 2) to a Template A square (Fabric 1) as shown to make the block center.

2. Stitch a Template C piece (Fabric 3) to a Template D triangle (Fabric 2), stopping $\frac{1}{4}$ " from inner corner. Set-in a Template CR piece (Fabric 3).

3. Add Template E triangles (Fabric 4).

4. Stitch Template F and FR triangles (Fabric 5) to a Template G triangle (Fabric 6).
